# How much process is enough?

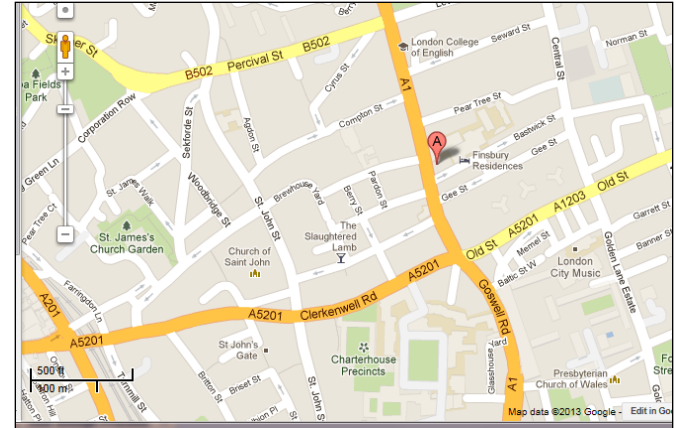

size

documentation

expectations

process models

# Criticality / Complexity of Application

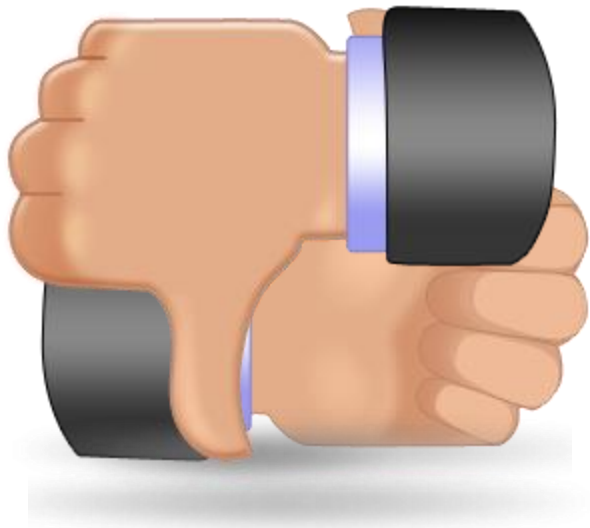

# Ask ..

- Who wants it?
- Why do they want it?
- i.e. What problem are they trying to solve
  
- then .... Ask yourself, what is the simplest then you can possibly do?

# Simple Test Results

Be prepared to discuss why ... and risks if it is a thumbs down

**What is right for you?**

**It depends ...**

**Ask why, what, for whom?**

**Keep it simple, if you can.  
But, make sure it adds value.**
