

Open Source Automation Tools: An outsider looking in

Presenter: Michael Pollino

The Good

- Cost
- Try before you buy
- Flexibility
- Portability
- Active community
- Development Team involvement

The Less Good

- Development Team involvement
- Learning and Setup Cost
- Uncontrolled documentation
- Testing outside the DOM
- Framework Overload

open source

Where to from here?

- Product and User Maturity
- Clearer Best Practise Standards
- Easier Setup
