

Training Courses - Christchurch

Software Testing Courses in Christchurch

Planit is launching a training program here in Christchurch, specifically for Christchurch. Keeping up with the latest trends and good practices is always difficult. Planit's courses will help you sharpen your skills, learn new techniques and stay current. All courses include discussions for all lifecycle models and offer time with our experienced instructors to discuss how to apply good practices in your environment.

The location of each course is TBA, depending on the size of the class.

If you cannot attend classes but still want the benefit of training, Planit also offers online self-paced training.

To register for classes or online courses please click the link in the table below for the course you wish to attend.

Planit Seminars in Christchurch

We are also launching a series of seminars to help grow and build our software industry and testing expertise. These will be free 2 hour sessions focused on various testing related topics. You can find out more about these seminars through our monthly newsletter.

Planit Course Schedule

If you don't see the course you want or if you have questions, contact us! We're happy to create customised courses or add other courses to the schedule.
